Supporting Safety & Independence Through AI Technology

At our Oasis Assisted Living communities, we believe safety, independence, and peace of mind go hand in hand. Helpany's innovative technology enables our caregivers to identify potential fall risks earlier, providing another layer of thoughtful, personalized support for residents in Assisted Living and Memory Care.

Meet Paul

A smarter way to support safety

Paul is a small, radar-based device that uses artificial intelligence (AI) to recognize changes in residents' movement patterns without cameras or microphones.

How Paul Works

- Recognizes changes in movement patterns
- Alerts caregivers to potential risks
- Supports timely, personalized care

Privacy and Independence Matters

Paul works quietly in the background, ***without cameras or microphones***. It analyzes movement without recording video or conversations, allowing residents to maintain privacy and dignity and enjoy their personal space with confidence.

Technology That Supports our Caregivers

Our caregivers truly make a difference in ensuring resident safety and well-being.

Whether someone may need additional assistance during the night or their movement patterns suggest a change in condition, Helpany provides valuable insight and gives our caregivers another tool to better understand residents' needs and respond proactively.

Helpany does not replace the personal relationships, professional judgment, or hands-on assistance provided by our care teams. Instead, it complements the compassionate care that is central to life at The Oasis Assisted Living and Reflections Memory Care.

Meaningful Impact

Helpany has made a difference in the lives of our residents, care teams, and families. Here's what our community leaders have to say:

"At Fellowship Square Historic Mesa, resident safety and well-being come first. Helpany's AI-driven fall prevention system has transformed our approach to care. Famiels feel more at ease, and out team can focus on meaningful, procactive care."

Rena Phillips
Vice President of Operations, Historic Mesa

"With Helpany, we are now equipped to identify residents at risk and better prevent falls. We are empowered to be proactive and help our residents thrive- higher resident satisfaction and longer relationships are the result."

Jon Scott Williams
Vice President of Operations, Mesa

We're Here for the Moments that Matter

We understand that choosing Assisted Living or Memory Care is about finding a community where your loved one is known, valued, and supported.

Helpany is one of the ways we're bringing that commitment to life, combining innovative technology with the warmth and attentiveness of our care teams.
